PINO'S LAWN SEED

Park Lawn Mixture

A leading mixture for 55 years. We use only the highest quality, extra clean seed, as free from weeds as possible. A well-balanced mixture that will produce a rich, velvety permanent carpet. This mixture contains 50% Penn State Chewings Fescue, 35% Kentucky Blue Grass, 15% Certified Highland Bent. Sow 5 lbs. to 1000 sq. ft. **Lb. \$1.50, 2½ lbs. \$3.65, 5 lbs. \$7.25, 10 lbs. \$14.00, 15 lbs. \$20.75, 20 lbs. \$27.00, 25 lbs. \$33.50, 50 lbs. \$66.00, 100 lbs. \$132.00.**

Shady Nook Grass Mixture

As it is quite difficult to produce a satisfactory growth of grass in shady spots, we have made a special mixture for such places. In very shady places sometimes soil will be found to be sour and in this case an application of limestone will be quite helpful, using about 50 pounds to each 1000 square feet. More applications of fertilizer will be needed and during dry weather be quite liberal with water. **Lb. \$1.35, 2½ lbs. \$3.15, 5 lbs. \$6.25, 10 lbs. \$12.00, 15 lbs. \$16.80, 20 lbs. \$22.00, 25 lbs. \$27.00, 50 lbs. \$52.50.**

Columbia Park Lawn Mixture

A mixture of suitable grasses for lawn use eliminating the high cost varieties composing a large part in our Park Law and Shady Mixture. We plan to give a mixture to compete with many offerings containing grasses not suitable for such uses. **½ lb. 45c., 1 lb. 80c., 2½ lbs. \$1.95, 5 lbs. \$3.85, 10 lbs. \$7.50, 25 lbs. \$18.25, 100 lbs. \$70.00.**

Just slip the can in the spiral Wand, touch the ground as you walk, the deposited granules will do the rest. Kills Dandelion, Plantain, Buckhorn, Chickweed and others. Wand and Touch combination **\$1.89.** Refill can Touch 69c.

Sweet Peas

The proper time to spade the garden for Sweet Peas is in the Fall, as the longer the soil remains in the rough state the better. Give a liberal dressing of well-rotted stable manure, ground bone and a dusting of lime. Spade to a depth of 6 or 8 inches and allow soil to remain in the rough without chopping down. When sowing seed, see that the soil is firmly trodden down, as Sweet Peas require not only a deep soil but a firm one. Seed should always be sown early in Spring 1 inch deep, and when plants are well up thin to 2 to 4 inches apart. Pinch out tops to start branching.
